

# Electric Vehicles

Scan the QR code to reveal a useful website full of information & detail about buying & running an electric vehicle.

***Electric vehicles are becoming increasingly popular helped by a growing network of rapid charging points & lower prices. We have a small selection of electric vehicles on display here. More information about purchasing & running an electric vehicle is available above, helping to make informed decisions when thinking about changing your car.***

**Don't forget that electric vehicles make a contribution to cleaner air & reduced traffic noise too! Typical cost per mile is between 4 to 5p per mile but can be free with solar power & vehicles are now being supplied with 8 year or 100,000 mile battery warranties. Some vehicles have ranges up to 390 miles between charges.**
