

Wildlife Friendly Addingham

Making space for nature @ The Memorial Recreation Ground

The grass in the bottom corner is left unmown through the summer, so wildflowers can grow and set seed, and bees and butterflies can collect the nectar and pollen.

This is part of the Management Plan we've agreed with the Parish Council to create wildlife friendly habitat and combat climate change at this greenspace

Weedkiller is no longer used to manage vegetation .

New trees and shrubs have been planted on the steep banks, corners and margins of the field to create more habitat for birds, insects and other wildlife.
